

Consumer Information: Passage and Placement Rates

Employed or Continuing Education within One-Year of Graduation

Graduating Cohort	Percent
Class of 2017	60%

Notes:

The Class of 2017 data includes responses Alumni One-Year Out Survey, Senior Exit Survey, and data from the National Student Clearinghouse. The overall knowledge rate for the surveys was 77% (272/352). With supplemental continuing education data from the National Student Clearinghouse, there is data on 84% (294/352) of the graduates for the Class of 2017.

Results based on **valid percent, as reported above**, uses a denominator equal to the number of valid/known information collected about a graduating class. Percentages are not based on the whole class but rather only those we know something about. The valid percent for the Class of 2017 is 60% (177/294).

Results based on **total percent** uses the full graduating cohort as the denominator. Percentages are provided regardless of whether or not we actually know anything about their circumstances. The total percent for the Class of 2017 is 50% (177/352).

Sources: Alumni One Year Out Survey, Senior Exit Survey, and National Student Clearinghouse.
